SWING SERIES

Swing doors allow complete access—great for small or uniquely-sized openings. The aluminum frames come in satin or bright anodized color choices. In addition to standard sizes, we can quickly construct doors to your custom size. Swing doors do not require casing—a real time and money saver in hotel and institutional construction.

Daiek doors are manufactured in Michigan. We strive to minimize our impact on the environment with a goal of continuous improvement in efficient processes and responsible use of natural resources. For more information, visit Daiek.com.
